

NewEra Pumps Maker

We provide pumps with quality...!

Series NEPP

Series NEPP is a solid injection moulded pumps are available in polypropylene (PP), these are suitable for solutions which are compatible with PP, such as Acids, caustic & etc,

Range:

Capacities Q : Up to 150m³/hr
Head H : Up to 80m
Pressure P : 8bar
Temperature T : Up to 80°C

Series NEPM

Series NEPM is a monoblock type pumps, which are available in polypropylene (PP), these are suitable for solutions which are compatible with PP, such as Acids, caustic & etc,

Range:

Capacities Q : Up to 80m³/hr
Head H : Up to 80m
Pressure P : 8bar
Temperature T : Up to 80°C

Series NELP

Series NELP is a solid injection moulded pumps are available in PTFE materials, these are suitable for solutions which are compatible with PTFE, such as HCL, H₂SO₄, HNO₃, ATP & etc,

Range:

Capacities Q : Up to 250m³/hr
Head H : Up to 100m
Pressure P : 10bar
Temperature T : (PFA=260°C) (PVDF=120°C)

Series NESS

Series NESS is a metallic pumps are designed for heavy-duty services, The pumps are available in different materials such as, carbon steel, Ss304, Ss316, Ss316L

Range:

Capacities Q : Up to 400m³/hr
Head H : Up to 150m
Pressure P : 15bar
Temperature T : Up to 260°C

Series NEMM

Series NEMM is a monoblock metallic pumps are available in different materials such as, carbon steel Ss304, Ss316, Ss316L

Range:

Capacities Q : Up to 100m³/hr
Head H : Up to 80m
Pressure P : 8bar
Temperature T : Up to 260°C

We also provide spare parts of any pump manufactured by us such as:

- | | |
|--------------|--------------|
| 1. Casing | 2. Shaft |
| 3. Impeller | 4. Sleeve |
| 5. Backplate | 6. Mech-Seal |
